

## Abstract

BrokeToRich (BTR) is a decentralized utility token built on the Binance Smart Chain (BSC), designed to power a mobile game.

## Token Overview

Token Name: BrokeToRich

Symbol: BTR

Blockchain: Binance Smart Chain (BSC)

Total Supply: 200,000,000 BTR

Smart Contract: (To be announced upon launch)

Website: <https://broketorich.online>

## Utility: Mobile Game Integration

The BrokeToRich mobile app is a gamified financial simulator where users go from broke to rich through digital commerce.

Key features include:

- Player-to-player trading of digital assets
- Buy and sell in-game NFTs (houses, vehicles, clothing, boats, etc.)
- Competitive leaderboards and in-game rankings
- Exclusive upgrades and perks paid in BTR

The game will be available on Android and iOS.

## Website Features

Via the main website, users can:

- Swap BTR using PancakeSwap
- Connect wallets to view balances and make trades
- Access game updates and NFT marketplace
- Participate in staking and future governance proposals

## Governance (DAO)

BrokeToRich will evolve into a decentralized governance model where holders of BTR can vote on:

- Game feature development
- Allocation of treasury funds
- Partnerships and marketing proposals
- Expansion and integrations

Votes will be proportional to token holdings (1 BTR = 1 vote), with transparent on-chain or snapshot voting systems.

## Tokenomics

Category	Allocation
----- -----	
Team & Development	10%
Game Development	15%
Community Incentives	25%
Liquidity & DEX	30%
Marketing & Partners	10%
DAO Treasury	10%

Funds collected through taxes or trading fees will be reinvested into platform development, marketing campaigns, and community growth.

## Future Plans

BrokeToRich aims to establish a strong and active crypto-gaming community. The roadmap includes:

- Strategic partnerships with GameFi and NFT platforms
- Contract audits by trusted third-party firms
- Listings on CoinGecko, CoinMarketCap, and major DEXs
- Long-term brand development and global marketing
